Mikołaj Sodzawiczny

Software Engineer

SUMMARY

Creative, detail-oriented,full-stack software engineer with a deep interest in accessibility and robotics. Proven track record of creating and implementing successful front and back end web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100devs, Los Angeles, CA

January 2022 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management

Recent Projects:

NYT Book Carousel (Fullstack Web App) – Everybody can see current week's best selling hardcover fictional books. The web app is minimalistic and uses NYT api at its core.

Netflix Clone (Fullstack Web App) – A Netflix UI clone built with Firebase where users can register and login to the website.

Tony's Speciality (Frontend Website) – Beautiful website for a cafe based in Lisbon that serves speciality coffee

Lentil Bonanza (Frontend Website) – Minimalistic restaurant website with playful color palette

100Hours Project (in progress) – ReallyBooky is a book-tracking platform currently being built that will allow fellow readers to track their progress, choose a random book and many more

Other Projects: Random book chooser, D&D checker , Los Angeles StarGazers Society APOD Web App with NASA API integration, On-demand background color changer for Partnered Twitch streamer, and many more,

Content Moderator at Teleperformance Portugal | Lisbon, PT

September 2021 — December 2021

Worked with technical software to help AI build its recognition of harmful content or content that broke given social media platform guidelines
